

Annual Safety Review Summary 2009

The agency maintained all health and safety requirements during 2009. The agency passed the annual fire inspection of all sites. All safety equipment was maintained as required. General maintenance and cleaning were performed on a regular basis.

There were two notable changes during the year. In late 2008 and early 2009, the agency began installing cameras in the reception/waiting areas of all of the office sites. The cameras record directly to the agency's secure network and provide an added safety measure for all clients and staff.

In July of 2009, the front porch and sidewalk of the 624 building received updates in order to improve the safety of the entrance to the building.
